Concentrated Mercedes-Benz

Much as condensing carbon creates a diamond, condensing the essence of Mercedes-Benz produced something similarly brilliant: the A-Class. Despite its modest dimensions, it's everything a Mercedes-Benz should be: intelligently designed, robust, versatile and, of course, beautifully made. Experience Mercedes-Benz at its most concentrated, with the A-Class.

See Mercedes-Benz in a new light. With a wide selection of new finance and upgrade offers available across our model range, now is a great time to get yourself behind the wheel of a Mercedes-Benz. For further information contact your local Mercedes-Benz Retailer or visit www.mercedes-benz.co.uk/offers

Model shown with 18" AMG 5-spoke alloy wheels (no longer available)

Follow your heart – or your head

The versatile and stylish A-Class

All too often the heart says yes, but the head begs to differ. With the A-Class, however, they're sure to agree. Its high seating position and spacious, versatile cabin make it a highly rational choice. And yet its distinctive one-box design and eye-catching grille, bumpers and headlamps make it an emotionally satisfying one too. What's more, it now looks fresher than ever, with more defined bumpers, a more tapered grille and more striking headlamps. So why not follow your heart and listen to your head? They'll both point you towards your Mercedes-Benz Retailer.

Model shown with 18" AMG 5-spoke alloy wheels and bi-xenon headlamps (no longer available)

A pleasure trip for the eyes

The stylish A-Class exterior

Model shown with 18" AMG 5-spoke alloy wheels and bi-xenon headlamps (no longer available)

There's so much to see with an A-Class – and not just because of the excellent all-round visibility. The exterior, too, is a treat for any driver's eyes. From the sharply raked front end to the swept-back roof line, its profile is as attractive as it is unmistakable, with a sporty short aerial that further enhances the dynamic lines. Body-colour exterior mirrors and door handles add a touch of elegance, while the large vertical tail light clusters and low bumper make for a highly distinctive rear.

More freedom of choice for drivers

You know what you're looking for in a car. Which is why the A-Class leaves all the key decisions to you.

The highly versatile 5-door body style is available in Classic SE and Avantgarde SE model lines. There's also a range of petrol and diesel engines, manual or automatic transmissions.

Model shown with 18" AMG 5-spoke alloy wheels (no longer available)

A car that looks after people and planet

Maximum safety, minimum environmental impact

The A-Class takes good care of all its occupants, ensuring they enjoy optimum comfort and safety. It looks after the environment too: the steel, alloys and plastics are recyclable, and there are even renewable materials such as coconut fibres in the seats. In addition, many steps were taken to reduce emissions during manufacturing, while the fuel-efficient engines offer low CO₂ emissions. The standard ECO start/stop function for the A 160 BlueEFFICIENCY will reduce fuel consumption even further.

What's more, the A-Class is certified to the strict international environmental standard ISO 14062 – Mercedes-Benz being the only car maker to date to meet this criterion. This certification doesn't just cover emissions, but rather the complete life cycle of the vehicle from production to end-of-life and recycling.

Model shown with 18" AMG 5-spoke alloy wheels and bi-xenon headlamps (no longer available)

BlueEFFICIENCY – technology for more efficient driving

As the inventor of the motor car, we feel we have a special responsibility for improving its resource efficiency – without compromising on safety, comfort and driving pleasure.

Our comprehensive BlueEFFICIENCY measures have already brought significant cuts in fuel consumption to many current Mercedes-Benz models, helping to lower both their CO₂ emissions and their running costs. What's more, we are continuing to develop new environmentally friendly technologies that will reduce emissions even further and help to make motoring more sustainable in the long term.

BlueEFFICIENCY – the Mercedes-Benz efficiency drive. In addition to highly advanced and efficient engines, BlueEFFICIENCY models come with a range of energy-saving measures that enable fuel

consumption and CO₂ emissions to be reduced by up to 25%. These measures vary from model to model but can include ECO start/stop, on-demand ancillary components and low-resistance tyres, as well as aerodynamic optimisation and the use of lightweight materials.

BlueTEC – cleaner diesel power. BlueTEC is our cleanest diesel technology to date. Its combination of advanced common-rail direct injection, optimised combustion and modular emissions control systems reduces particulate levels by up to 95% and removes up to 90% of nitrogen oxides, leaving little but water, harmless nitrogen and the satisfaction of knowing you've done your bit for the environment.

HYBRID and BlueTEC HYBRID – the future of internal combustion. The next stage in our

efficiency drive, hybrid drivetrains will bring new levels of fuel efficiency and emissions reduction to tomorrow's Mercedes-Benz passenger cars. The petrol/electric **HYBRID** system allies an economical internal combustion engine to an electric motor that not only assists the engine when accelerating but also recovers kinetic energy during braking. In addition, the system automatically shuts off the engine as the car slows to a standstill, helping to reduce fuel consumption even further. The diesel equivalent, **BlueTEC HYBRID**, combines the benefits of

BlueEFFICIENCY measures substantially reduce fuel consumption and CO₂ emissions

hybrid drive with the clean-burn technology of BlueTEC. It achieves outstanding fuel economy while keeping harmful emissions to a minimum.

E-Cell and F-Cell – new drivetrain concepts.

We are also committed to the development of electric powertrains that produce zero local emissions. To this end, we've already produced limited runs of our A-Class E-Cell and B-Class F-Cell vehicles. The F-Cell, whose electric motor is powered by a hydrogen fuel cell, recently completed the F-Cell World Drive endurance test,

The HYBRID system lowers fuel consumption by up to 20%

proving itself in all kinds of driving conditions. The E-Cell meanwhile, which is powered by twin lithium-ion batteries and has a range of more than 120 miles, is currently being trialled in real-world conditions by drivers across Europe. In 2013, we also expect to begin production of the SLS AMG E-Cell,¹ an all-electric supercar that delivers breathtaking performance. The planned E-Cell Plus drivetrain, meanwhile, will combine electric battery power with a small range-extending internal combustion engine.

The SLS AMG E-CELL¹: local emissions-free driving with a battery-powered electric motor

Design for Environment. Our environmental philosophy is not just about in-car technologies. It also involves taking the entire lifecycle of each vehicle into account, from its initial planning to its end-of-life recycling. We apply the same approach to the building and maintenance of new factories too, saving energy, avoiding harmful emissions and making increasing use of renewable resources. In addition, Mercedes-Benz is involved in the development of alternative fuels and conducts research in the field of bionics.

For more information about what BlueEFFICIENCY can do for you, please visit www.mercedes-benz.co.uk/blueefficiency

¹ Provisional efficiency rating: A++

Figures are not based on an individual vehicle and do not constitute part of the product offer; they are provided solely for purposes of comparison between different models

More environmentally friendly diesel engines

At Mercedes-Benz, we take our environmental responsibilities seriously. Which is why we're constantly working on ways to improve our diesel engines' efficiency.

For the A-Class, there are two manual CDI models to choose from: the A 160 CDI BlueEFFICIENCY and the A 180 CDI, with outputs of 82 hp (60 kW) and 109 hp (80 kW) respectively.

The A 160 CDI BlueEFFICIENCY is a particularly efficient performer, with a combined fuel consumption of 62.8 mpg and CO₂ emissions of just 118 g/km – the lowest in the entire Mercedes-Benz range.

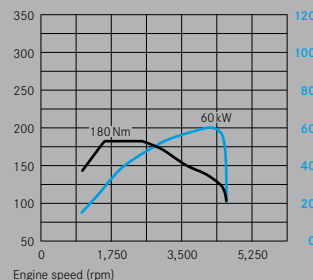

An automatic version of the A 160 CDI with continuously variable Autotronic transmission is also available.

For more details about the fuel consumption and CO₂ emissions of all A-Class models, please refer to pages 48–49.

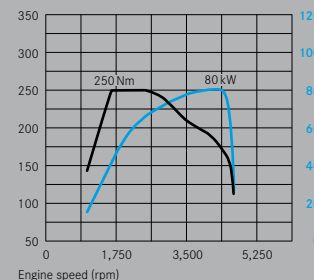

Thanks to a range of technical enhancements, the BlueEFFICIENCY models offer greater fuel economy and lower CO₂ emissions

A 160 CDI BlueEFFICIENCY

A 180 CDI

— Torque (Nm) — Power (kW)

Start saving every time you stop

The ECO start/stop function

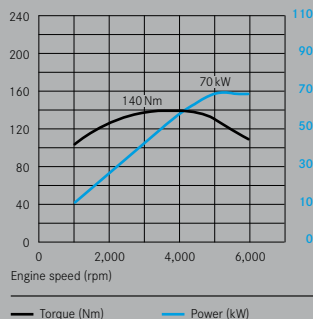

With the A-Class, you can save money and cut emissions at every junction or traffic light. Thanks to its ECO start/stop function, the A 160 BlueEFFICIENCY petrol model turns the engine off when it's not needed, reducing both overall fuel consumption and CO₂ emissions.

The principle is simple: just put the car in neutral when coming to a standstill and the ECO start/stop function automatically cuts the engine. Once the ECO indicator on the instrument display confirms the system is operational and the vehicle is at rest, you can release the foot brake pedal and the engine will remain off until you engage first gear. The engine will then start up again – quietly,

smoothly and fully automatically. The result is up to 12% lower fuel consumption, with combined cycle figures of 47.1 mpg for the A 160 BlueEFFICIENCY.

A 160 BlueEFFICIENCY

We don't like to interrupt

Advanced transmissions for faster, smoother gear changes

Whether you like your driving sporty or smooth – or both – the A-Class transmissions are a joy to use. The 5-speed manual transmission, specially adapted to each engine, offers smooth gear changes to transform engine power into agile ride comfort. For higher torque the 6-speed manual transmission (standard on the A 180 CDI) comes with a three-shaft concept with compact dimensions and weight-saving

design. For even smoother gear changes, there's the optional continuously variable Autotronic transmission. It recognises your driving style automatically and adjusts the engine speed accordingly. Thanks to the absence of fixed gear ratios, it also gives you uninterrupted acceleration, delivering power to the front wheels in a constant flow and allowing the engine to maintain the ideal speed at all times.

Should you feel like a more hands-on drive, simply engage manual mode and switch between seven virtual gears.

Hill Start Assist is a useful braking aid that helps you pull away safely on inclines. By applying the brakes for a split second, it stops the car from rolling backwards as you switch from brake pedal to accelerator.

Model shown with 18" AMG 5-spoke alloy wheels and bi-xenon headlamps (no longer available)

Some people believe in guardian angels. We prefer to put our faith in technology

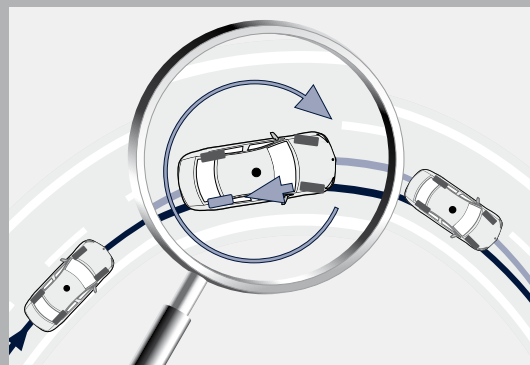

Active safety in the A-Class

Whatever your destination, we want to ensure you arrive safely. That's why our engineers are constantly looking for ways to reduce the risk of an accident – and why the A-Class comes with a host of active safety systems that help you to avoid or defuse dangerous situations – systems such as the Electronic Stability Programme (ESP®), Acceleration Skid Control (ASR) or Brake Assist (BAS).

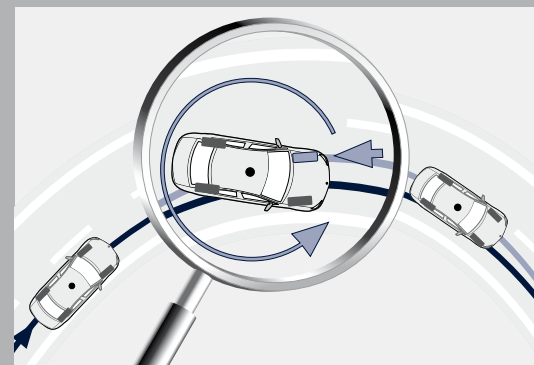

BAS ensures maximum braking force is applied in emergency stops, increasing braking pressure if you press the pedal hard but not quite hard enough. At the same time, the anti-lock braking system (ABS) helps you to keep control of the

vehicle, applying braking pressure in rapid bursts and thus preventing the wheels from locking up. Your A-Class even warns those

behind of the danger, with the adaptive brake lights flashing several times a second during emergency braking.

ESP®: braking action to counter understeer

ESP®: braking action to counter oversteer

Model shown with 18" AMG 5-spoke alloy wheels and bi-xenon headlamps (no longer available)

Personal protection for all

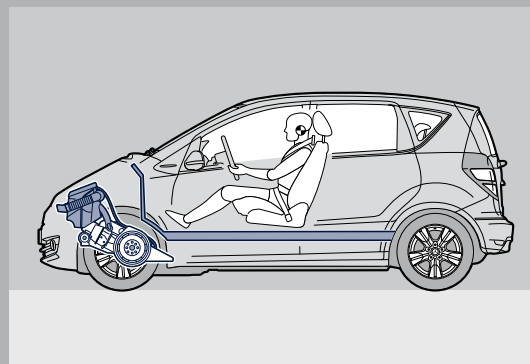

Passive safety in the A-Class

Even if the worst comes to the worst, you can depend on the A-Class to look after you.

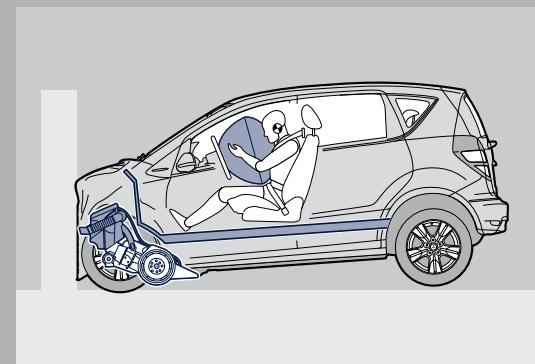

In a front-end collision, its unique construction allows the engine and transmission to slide down the sloping pedal floor and under the passenger compartment, significantly reducing the risk of injury to its occupants.

The A-Class takes instant action in rear-end collisions too, moving the head restraints forward in order to prevent whiplash injuries. It also helps the emergency services to locate

the vehicle in the event of an accident, switching on the interior lighting (if set to auto) as

soon as the airbags or seat belt pre-tensioners are deployed.

Model shown with 18" AMG 5-spoke alloy wheels and bi-xenon headlamps (no longer available)

Have a pleasant journey

The A-Class cabin

With the A-Class, arguments over who's going to sit where are a thing of the past. Instead, everyone gets to travel in space and comfort, with generous accommodation for both front and rear seat passengers. There's plenty of light for all too, thanks to the large windscreen and windows, while the optional panoramic louvred glass sunroof enables you to open your A-Class to the skies.

The ergonomically designed seats, standard air conditioning and multi-function steering wheel further add to the high levels of comfort and convenience, while the easy-to-read instruments and trip computer tell you everything you need to know at a glance. Naturally, the entire cabin is finished in only the highest-quality materials – after all, you wouldn't expect any less from a Mercedes-Benz.

Interior shown with rear armrest (no longer available)

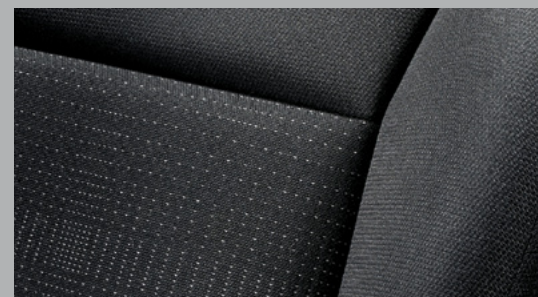

A-Class Classic SE

The A-Class Classic SE is an attractive proposition, with body-colour bumpers and door handles enhancing the striking one-box design, plus body-colour exterior mirrors that have a larger glass area than ever before. Clear-lens halogen headlamps and a dark grey radiator grille further add to the appeal and there's a choice of attractive wheel styles, with 15" 7-hole steel wheels as standard.

Inside, High-Gloss Black trim and Mechelen cloth create a refined ambience, while the generous standard equipment includes air conditioning, Hill Start Assist and a multi-function steering wheel that puts a host of functions at your fingertips. The comfortable surroundings are completed by the Audio 20 radio/single CD with 6 speakers, telephone keypad and Bluetooth® interface.

A-Class Avantgarde SE

There's no mistaking the Avantgarde SE's sporty character. At the front, the body-coloured bumpers have a more pronounced V-shape and the radiator grille is finished in bright Iridium Silver. Chrome trim strips adorn the front, rear and sides, while an oval polished stainless steel tailpipe and 16" 5-spoke alloy wheels also come as standard.

The cabin, too, has an unmistakably sporty style, with brushed Smoke Silver aluminium trim, Bastogne cloth/Artico artificial leather upholstery, nappa leather-trimmed steering wheel and leather-trimmed gear shift and handbrake lever. The Avantgarde SE specification also includes the Seat Comfort Package, which comprises tilt adjustment and adjustable lumbar supports for the front seats plus height adjustment for the front passenger seat. All models have one-touch control electric windows at the front and rear.

With the Light and Sight Package the Avantgarde SE features rain-sensing wipers, automatic headlamps, a dimming rear-view mirror and additional lights for the inside of the cabin. There are reading lights for the driver's side and rear as well as footwell lights in the front.

Feel-good factor

The optional Luxury Package

For an A-Class that does even more for your well-being, specify the optional Luxury Package. Available for the Avantgarde SE, it adds comfort-enhancing extras such as leather upholstery and heated front seats.

Finding your ideal driving position is made even easier, thanks to front seats that are electrically adjustable for fore/aft position, backrest angle, seat height and tilt and head restraint height adjustment.

Interior shown with multi-contour seats (no longer available)

Sportswear at its most stylish

The optional Sports Package

With the Sports Package, your A-Class is always dressed to impress. The radiator grille, with louvres in Iridium Silver metallic and chrome trim, makes a bold first impression, while the 17" 7-spoke alloy wheels and oval stainless steel exhaust tailpipe underline the car's natural style. The interior, too, gets a sportier look: the instrument cluster has a contrasting silver backplate, the sports steering wheel and aluminium-capped gear shift lever are both leather-trimmed, and the pedals feature stainless steel inserts with rubber studs.

The Sports Package also makes its presence felt on the road, thanks to lowered sports suspension that gives your A-Class even greater agility.

Model shown with bi-xenon headlamps (no longer available)

A truly hands-on approach

Multi-function steering wheel and ISOFIX child seat attachments

The best place for your hands is, of course, on the wheel. Which is why every A-Class comes with a multi-function steering wheel that puts a range of useful functions at your fingertips. It enables you to adjust the volume of the audio system for instance, operate your mobile phone or access trip computer information – all without taking your hands off the wheel or your eyes off the road.

For an equally firm grip on child seats, the A-Class is also equipped with ISOFIX points on the outer rear seats. They enable the seats to be attached directly to the car's body, limiting the potential for incorrect fitting and therefore reducing the risk of injury to the child in emergency braking or collisions.

Thanks to ISOFIX points and top tethers, rear child seats can be attached directly to the car's body, ensuring optimum safety for small children

You'll like the sound of this

Audio systems

The A-Class comes with a high-quality 6-speaker radio/CD player as standard, and boasts a range of great-sounding options too. These include an integrated 6-disc CD/DVD changer which includes a Media Interface, allowing connection and control of portable media devices (e.g. MP3 player, USB storage media) via ports in the glovebox, together with the necessary cables to enable connection of these items.

The standard Audio 20 offers Bluetooth® and an aux-in socket instead of the Media Interface.

The A-Class standard specification is generous to a fault

Air conditioning and the Bluetooth®-compatible 6-speaker radio – just two of plenty of features

Air conditioning ensures a pleasant temperature at all times

Adaptive brake lights warn others of an emergency stop

The car that parks itself

Active Park Assist with Parktronic

If you love driving but dread parking, we've got good news for you. The A-Class is available with optional Active Park Assist, an ingenious system that makes for hassle-free parking manoeuvres. Drive past a space and it assesses whether the car will fit, then, as soon as you engage reverse, steers you in all by itself. All you have to do is use the pedals to adjust your speed as required. As you get close to another car or obstacle, the system lets you know how much space you've got left via audible and visual warnings.

Proximity sensors in the front and rear bumpers monitor the distance to the nearest vehicle or obstacle

The display in the instrument cluster provides information on the parking manoeuvre

A brighter outlook for all

The optional panoramic glass sunroofs

It's not every day glorious sunshine hits these shores – all the more reason not to let it go to waste. With the optional panoramic louvred glass sunroof, you can make the most of the weather without leaving your A-Class.

At the touch of a button, the first louvre turns through 90 degrees to act as a wind deflector, then the other four slide back smoothly to reveal an opening that's far wider than that of a conventional sunroof.

It features a scratch-resistant surface and manually operated twin blinds for when you need shade.

The panoramic louvred glass sunroof

Interior shown with rear armrest (no longer available)

Special requests are our speciality

Optional equipment

Whatever your dream A-Class, you'll find the options to make it come true. Advanced in-car entertainment such as the 6-disc CD/DVD changer is a must for all music fans.

OPTIONAL EQUIPMENT (SELECTION)

Active Park Assist with Parktronic
Autotronic transmission including Speedtronic cruise control
Integrated CD changer, 6-disc, with MP3 compatibility – includes Media Interface
Luxury Package – includes leather upholstery, heated front seats and electrically adjustable driver and front passenger seats
Panoramic louvred glass sunroof

Speedtronic cruise control
Steering column – manually adjustable for height
Seat Comfort Package (standard on Avantgarde SE): Height-adjustable front passenger seat Seat cushion angle adjustment and lumbar support for driver and front passenger

Wheels for your A-Class

The A-Class offers a choice of eye-catching wheel designs, with 15" steel wheels as standard for the Classic SE and 16" alloy wheels for the Avantgarde SE.

15" 7-hole steel wheels (standard on Classic SE)

16" 5-spoke alloy wheels (standard on Avantgarde SE)

17" 7-spoke alloy wheels (optional on all models as part of Sports Package)

Accessories for your A-Class

With its highly variable interior, your A-Class adapts to all kinds of tasks. What's more, it can be tailored to suit your specific needs – by adding extras from the Retailer-fit accessories range. There are a variety of roof racks and boxes for instance – such as the New Alustyle ski and snowboard rack, or a 400-litre roof box that's made of durable high-quality material and is aerodynamically designed for optimum fuel efficiency. A specially developed interior-mounted bicycle rack is also available.

For those who want maximum music choice on the move, cables are available for connecting iPods, USB storage media and other auxiliary devices. In conjunction with the Media Interface, they enable you to access your audio files via the in-car entertainment system. In addition there's the hands-free phone system, operated by using buttons on the steering wheel.

For more information about these and other accessories, talk to your Mercedes-Benz Retailer or consult the A-Class accessories brochure.

Following the star

Test drive, Factory Collection and Mercedes-Benz Roadside Assistance

Test drive. A Mercedes-Benz is most at home on the road. This is the only way to experience the effortlessly superior driving feel that lends every Mercedes model its inimitable class. Feel the power of efficient engines with low fuel consumption, and precise steering designed to put you in the mood for driving. And experience what true comfort really feels like. The unique feeling of driving a Mercedes cannot be put into words, however. Which is precisely why we'd like to invite you to take a test drive. Your Mercedes-Benz Retailer will be happy to make all the necessary arrangements for you. Simply visit www.mercedes-benz.co.uk/testdrive to request a test drive. We look forward to seeing you.

Factory Collection. Experience the factory in Rastatt where your new Mercedes-Benz was built, and take the long way home by driving it through some of Europe's most beautiful countryside. Included in the Collection is an airport transfer to your hotel, one night's accommodation for one with dinner and breakfast, a tour of the Mercedes-Benz factory, five days fully comprehensive insurance, and a return crossing by Eurotunnel (Standard Class). All you will need to pay for is your one-way flight to Germany. For more information, please contact your local Retailer, the Mercedes-Benz Factory Collection team on **0845 273 9705** or visit www.mercedes-benz.co.uk/factorycollection

Roadside Assistance. Rest assured that should you ever need help, Mercedes-Benz Roadside Assistance is there for you. In the unlikely event of a technical breakdown¹ you can rely on the Mercedes-Benz Roadside Assistance Team – anywhere in Europe. Simply phone our Customer Assistance Centre on 00800 1 777 7777,² where our specialists will organise assistance for you. Mercedes-Benz will also assist you in the event of a minor mishap preventing you from driving your vehicle.³ Often the problem can be rectified on the spot, but if this is not possible, we will naturally ensure that your vehicle is taken to the nearest Mercedes-Benz Official Workshop to get you back on the road as quickly as possible.

¹ Technical breakdown cover is initially valid for your vehicle for four years from the date of first registration. This can be extended from the fifth year, up to a maximum of 30 years, on completion of each scheduled maintenance service, providing that this service is carried out by a Mercedes-Benz Official Workshop

² In non-affiliated European countries: +44 20 7975 7077

³ This cover can be retained from the fifth year. Your Mercedes-Benz Official Workshop will provide details of how to renew this cover once your initial four year term has expired

Take-back of end-of-life vehicles. Coming full circle. At the end of its long life, you can return your A-Class to us for environment-friendly disposal in accordance with the EC End-of-Life Vehicle Directive.¹ But that day lies a long way off.

¹Applies in accordance with national regulations to vehicles up to 3.5 t permissible gross weight. The A-Class has met the statutory regulations governing the suitability of the vehicle's design for reuse and recycling for a number of years now. A network of vehicle take-back depots and dismantlers has been established which will process your vehicle in an environment-friendly manner. The ways in which both vehicles and parts can be recovered are subject to ongoing development and improvement. Consequently, the A-Class will be able to comply with any future increases in the recycling quota within the stipulated time limits. Further information is available at www.mercedes-benz.co.uk or by calling 0808 156 6606.

Please note: this online version of the printed brochure may contain abridged copy or other content changes. The manufacturer reserves the right to make changes to the design, form, colour and specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the vendor or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be derived solely from these. The illustrations may show accessories and items of optional equipment which are not part of standard specification. Colours may differ slightly from those shown. This brochure provides a general indication of the range of models, features, optional extras and/or colours available in various countries. Some of the models, features, optional extras and/or colours shown may not be available in your country or may only be available in a different specification. Additionally, some models, features, optional extras and/or colours may only be available in combination with others. For current and more specific information in relation to the range of models, features, optional extras and/or colours available in your country, and their pricing, you should contact your nearest authorised Mercedes-Benz Retailer. E&OE.

Finance offers: on-the-road costs include VAT, delivery, number plates, first registration fee, 12 months' road fund licence and fuel. Written quotations available on request from your local Mercedes-Benz Retailer. We reserve the right not to allow these subsidised interest rates to be used in conjunction with any other offer. Credit provided subject to status from Mercedes-Benz Financial Services UK Ltd. Guarantees and indemnities may be required. Offers are subject to availability. Mercedes-Benz Finance is a trading name of Mercedes-Benz Financial Services UK Limited. Registered in England No. 2472364. A Daimler Company.
